TERRAFORM

NOVA

Project Specifications

Dimentions	3.6m High, 3.6m Wide
Build and break duration	1 day to instal, 1 day to break
Power requirements	1 x 16amp Feed

NOVA

Terraform has crafted ‘Nova’, a one-of-a-kind structure composed of multiple tetrahedrons. These are meticulously fashioned from 360-degree LED tubes interconnected to form a Star.

Once installed, this innovative design allows viewers to appreciate the installation from any angle. The installation will slowly change colour and display light patterns to create a focal point in any location. An optional sound system can be provided with a specially designed show synchronising the lights to a custom soundscape.

Mounted on a steel ballast frame to ensure it stays in place, with an optional handrail, although it can also be disassembled and rebuilt in another location. Lightweight enough to be carried upstairs in its separate components and placed on a roof if needed. With ‘Nova ‘, practicality and innovation go hand in hand. All its electronics and components are securely sealed within the base, creating a self-supporting structure. It operates efficiently with a single 16amp power supply, ensuring a hassle-free setup and operation, giving you peace of mind for your event or public space.

‘Nova’ was first exhibited in Salisbury during the 2023 Christmas lights. The link below shows a video of ‘Nova’ in action.

BUDGET

Items

• Equipment Hire - 10 Days	£7500.00
• 2 Crew to Install and derig the artwork - 2 Days	£1200.00
• Delivery and collection of all equipment	£800.00

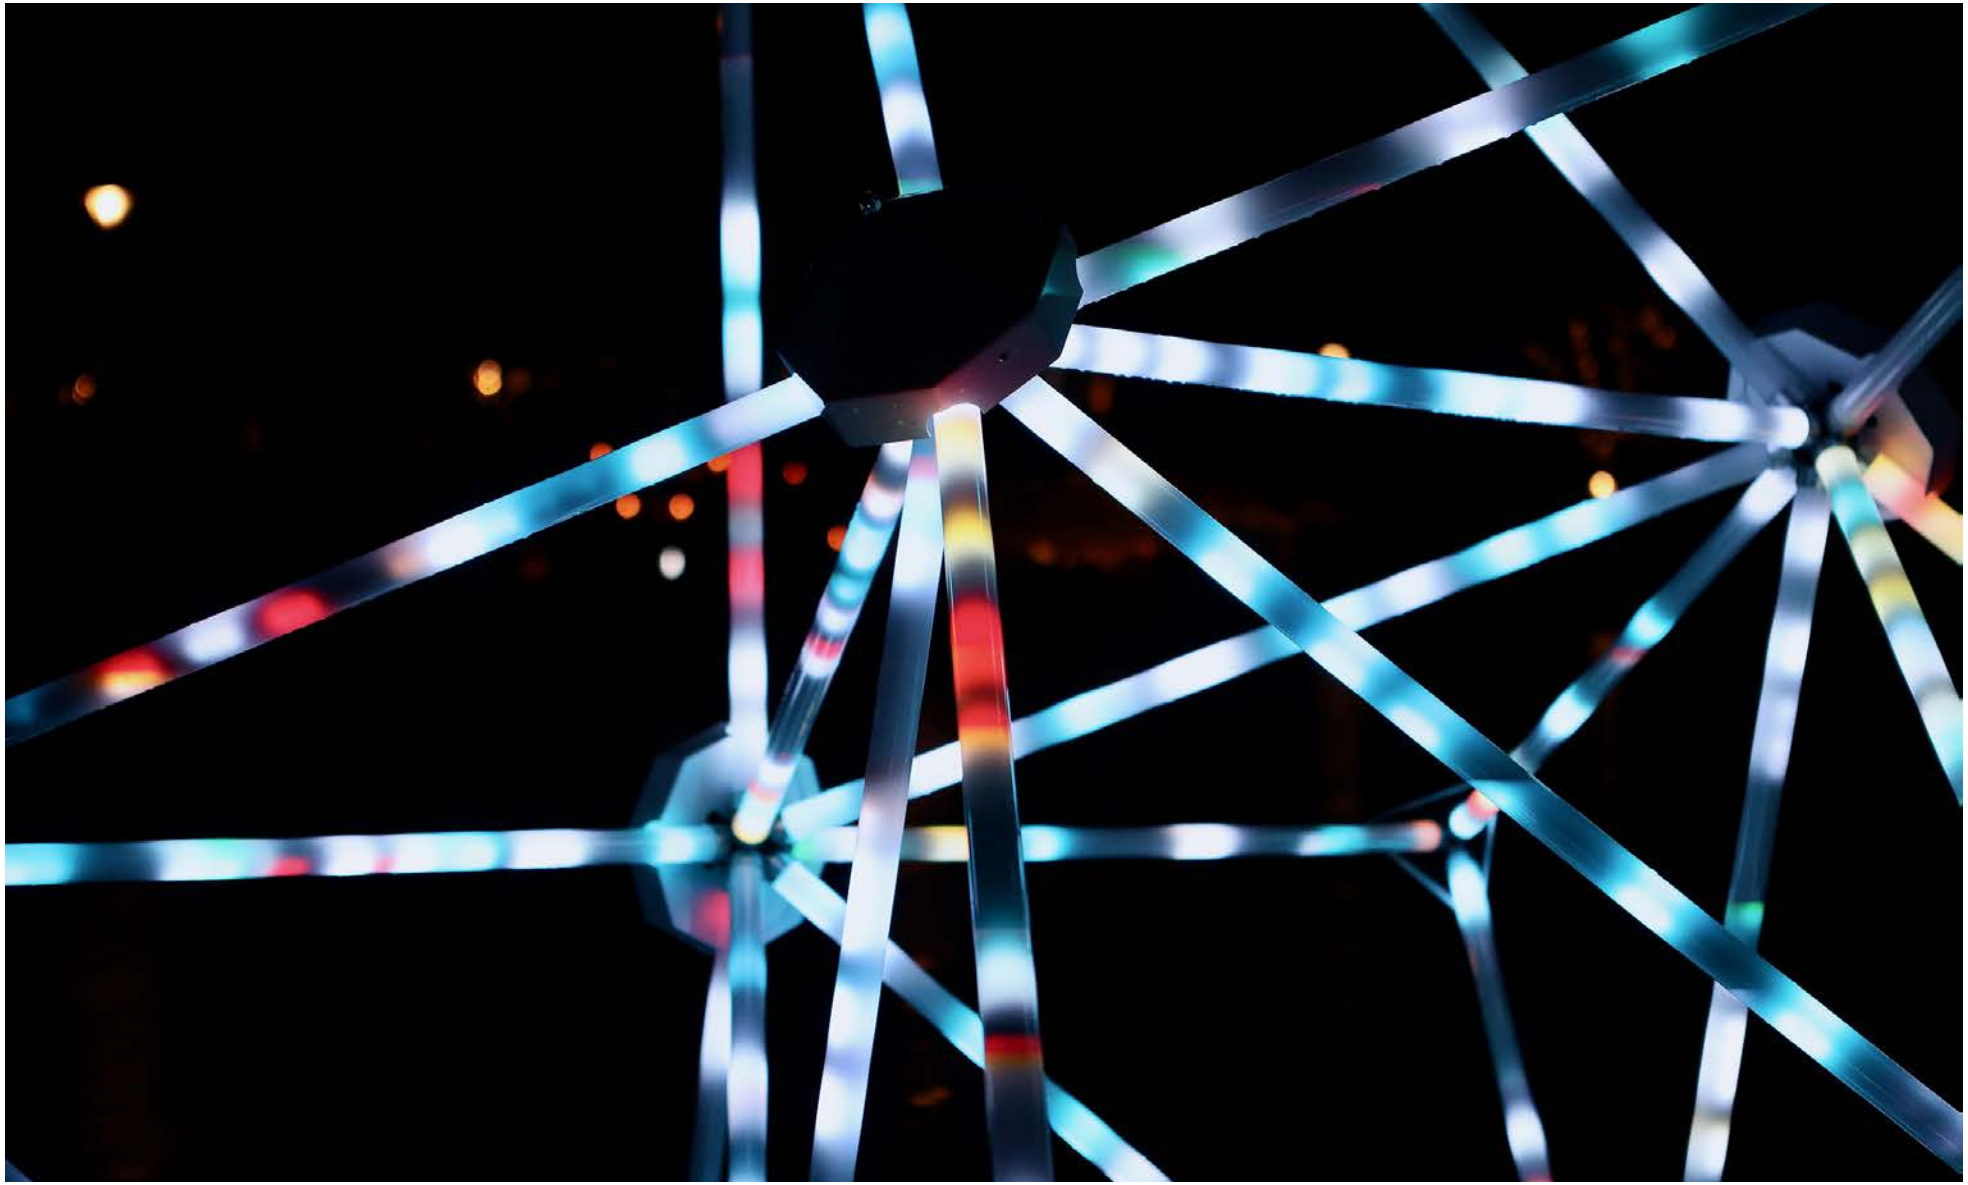
Totals

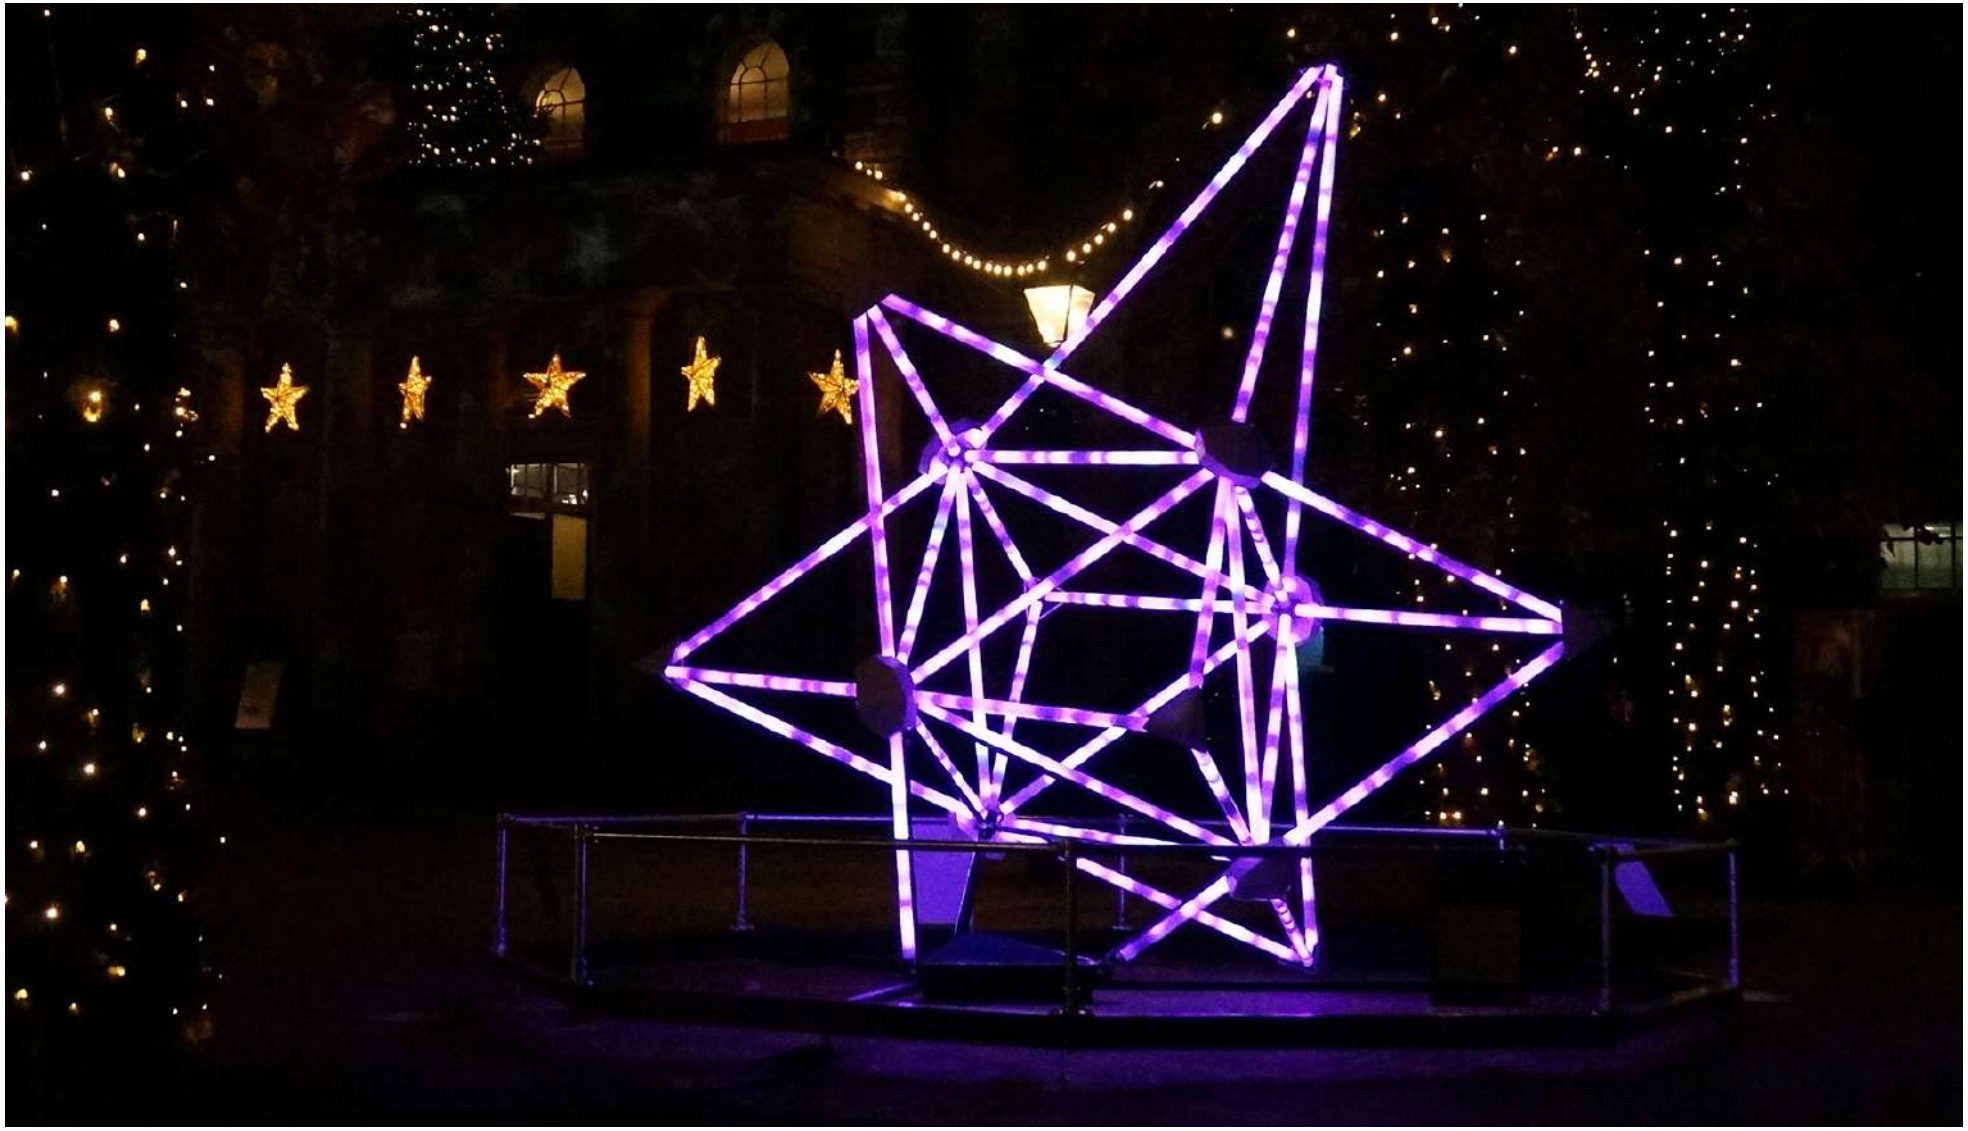
Sub Total	£9500.00
VAT	£1900.00
Grand Total for 10 days hire	£11,400.00

Documentation

On booking confirmation, we will supply all the relevant site-specific risk assessments and method statements, structural reports, other documents required to safely install and maintain the installation, and our full insurance documents. We strongly recommend a site visit be made before these documents are provided.

WE ARE HAPPY TO PROVIDE AN ESTIMATE FOR ANY LOCATION BASED ON ANY SPECIFIC REQUIREMENTS. PLEASE GET IN TOUCH IF YOU HAVE ANY QUESTIONS.





End.

TERRAFORM

A transdisciplinary studio specialising in designing & fabricating large-scale immersive art installations for public & private events since 2010.

We have a history of creating light art installations, notably for Glastonbury Festival's Cubehenge and stages for the Electric Dasiy Carnival, as well as corporate clients such as Liverpool Once, West Quay, and Boxpark.
