BRINGING MAGICAL ENGAGEMENT TO LIGHT NIGHTS

SPECTACLE, STORY AND SURPRISE

The Show Globe is a touring Outdoor Arts company like no other. We specialise in illuminated, interactive installations containing performers that roam through audiences enchanting, engaging and elevating the atmosphere at Light Night events. At the heart of our offering are our beautifully detailed, fully mobile performance pieces: The Show Globes.

These illuminated walkabout acts blend visual artistry, captivating character work, music and interactive push-button special effects with immersive storytelling. All this is housed within elegant, light-filled globes that roam and interact with audiences of all ages. They're magical snow globe shaped micro theatres of wonder!

WATCH THE MAGIC HERE

Whether it's one Show Globe or a full multiple Show Globe spectacle, our performers light up the town with magic, movement and meaningful engagement that is accessible for all.

From the moment our Show Globes appear, audiences are drawn in by their uniqueness and beauty, curious for the story within, mesmerised by their movement, and charmed by their characters. They don't just watch The Show Globe, they become part of it by pressing the big button on the front to trigger wonderful custom made special effects.

THE SHOW GLOBE EXPERIENCE

Our roaming acts are designed to enhance the visual landscape of Light Nights whilst providing a hands-on interactive element that family audiences can really engage with. Show Globe's are:

- **Visually stunning, intricately detailed, self illuminated performance pieces**
- **Intriguing and different, the characters within encourage audience interaction**
- **Non verbal performance using physical theatre, music, special effects, puppetry and lighting effects**
- **Accessible, tactile, sensory and safe for all**
- **Every Show Globe has a different special effect that is triggered by the audience pressing the button on the outside.**
- **Photo-worthy moments that invite audiences to share the experience**
- **Outdoor performance suitable for all weathers**

Each Show Globe is self-contained, mobile and requires no tech support from event teams, allowing for seamless integration into large-scale programmes. Whether appearing solo or as part of a multi-globe ensemble, The Show Globe brings a sense of intimacy and grandeur in equal measure.

THE MULTI-GLOBE SPECTACLE

When performing together, our Show Globes offer a dynamic and visually rich roaming installation. Audiences encounter different worlds, themes and characters as they journey through the space, offering layers of interaction and delight.

This multi-Globe performance offers:

- *Depth and variety across multiple visual themes*
- *Increased roaming coverage of the event footprint*
- *A unique way of manipulating an audience's experience and route through an area, through the changing pattern formations of The Show Globes.*
- *Expanded audience engagement, encouraging dwell time and exploration*
- *A true ensemble spectacle, creating a sense of momentum and magic throughout the night*

When all four Show Globes are in motion, they create a choreography of light and story that transforms the landscape. The subtle interplay between the characters, each with their own energy, aesthetic and style of interaction, forms a living tapestry that evolves as it moves. The audience doesn't just encounter a performance; they experience a rolling transformation of their environment.

Each Show Globe adds a new chapter to the visual narrative: the mysterious shimmer of the Mystic Mirror Globe, the playful bloom of the Enchanted Flower Globe, the tranquil drift of the Sea Sphere and the nostalgic glow of the Living Snow Globe. Together, they create a continuous, immersive atmosphere that feels both spontaneous and beautifully curated.

The Multi-Globe Spectacle is particularly suited to events with a large open area, or multi-zoned footprints. Whether weaving through streets, filling a market square with a choreographed piece, encircling key landmarks, or populating different areas throughout the evening, our ensemble of Show Globes brings colour and cohesion to every corner they touch.

OUR CURRENT COLLECTION OF GLOBES

MYSTIC MIRROR GLOBE

A breathtaking visual feast, the Mystic Mirror Globe plays with light and reflection to mesmerising effect. With its majestic gilt mirrors that can spin and even crack open with the press of the button, it becomes a living light sculpture in motion.

The wise Mystic is a character of wisdom and elegance, whose presence captivates and intrigues. She picks spectators and offers them a choice of boxes, different outcomes await! Reflecting both light and faces, this Show Globe invites audiences to see themselves inside the spectacle, creating a layered, immersive experience unlike anything else.

The Mystic Mirror Globe works especially well in urban landscapes and contemporary settings, where artificial light bounces and refracts across the mirrored surfaces. It encourages quiet contemplation as much as crowd interaction, offering a calm, surreal spectacle that elevates any Light Night environment.

ENCHANTED FLOWER GLOBE

Bursting with vibrant colour and botanical fantasy, the Enchanted Flower Globe is an ethereal garden brought to life. Adorned in intricate floral detailing, petals and leaves cascade around its character Floris, in a celebration of nature. She is a joyful spirit of the garden, curious, graceful and gently playful. She breathes life into all the beautiful puppet creatures living within, using the help of her nearby spectators. By night the Enchanted Flower Globe glows from within, creating a floating floral dream that invites audiences to stop, smile, and share a moment of magic.

A press of the button on the outside sends her twinkling blossom mobile into a gentle spin, much to the delight of the butterflies, and her onlookers.

The Enchanted Flower Globe brings a breath of warmth to colder months and offers a perfect visual counterpoint to more wintery Light Night themes, drawing audiences into a world of gentle colour, light and renewal.

SEA SPHERE

Submerged in an oceanic world of dancing seaweed, floating jellyfish and bioluminescent beauty, the Sea Sphere invites audiences into a deep-sea dreamscape. Rich marine textures swirl around a serene, mysterious Mermaid who dances through the night with flowing gestures and glowing presence. Waves of calm meet waves of curiosity as audiences are pulled into this siren's underwater world through music and interactive nautical sound effects.

This Show Globe resonates particularly well with children and families, who are often drawn to its soothing aesthetic and imaginative, fantastical theme. A press of the big button sends plumes of bubbles out into the audience space along with bubble sounds! The Sea Sphere thrives in open spaces, where it seems to glide like a living wave through the crowd. Its subtle movements and soft palette provide an ideal moment of other worldly quiet in an urban landscape.

LIVING SNOW GLOBE

Our original and most recognisable act, the Living Snow Globe captures the timeless magic of winter, whatever the season outside. Inside this detailed icicle landscape, our Snow Queen sits. She glides through the cold with regal grace, charming audiences with warm eye contact and playful gestures. She encourages her audience to press the big button which triggers the huge snowstorm inside the Living Snow Globe. Snow swirls around her as she moves, creating a moving memory of festive nostalgia.

Whether used as a centrepiece or in combination with other Show Globes, the Living Snow Globe is a reliable highlight, an iconic, heartwarming piece that instantly draws a crowd and creates lasting impressions. Its emotional resonance is universal, appealing across generations and cultural backgrounds.

Perfect for Light Nights, it delivers a sense of wonder with the familiarity of childhood snow globes but with an interactive wow factor that few performances can match.

WORKING WITH THE SHOW GLOBE

We pride ourselves on professionalism, adaptability and the ease of working with our team. Our Show Globes are:

- Individually powered (no cabling or external power needed)
- We provide all our own backstage needs, including dressing rooms inside our specially designed, self powered rigs.
- Fully mobile and self contained
- Weatherproof, they will still perform in wind and rain
- Designed to navigate all single level surfaces from asphalt to firm grass, cobble stones and paving slabs.
- Managed by experienced, discreet technicians

From pre-event logistics to on-the-day delivery, we ensure a smooth and successful experience for event organisers, while delivering unforgettable moments to your audiences.

Let your Light Night shine even brighter!
If you're programming a Light Night that demands artistic excellence, crowd-pleasing performance and effortless integration, The Show Globe is ready to step into the light.
